QUESTION: 1

You're preparing to upload learning content for Self-Paced Activities. Which two types of con-tent are loaded as ZIP files?

Option A : Video

Option B : AICC

Option C : SCORM 1.2

Option D : PDF

Option E : Microsoft PowerPoint

Correct Answer: B,C

QUESTION: 2

As a Learning Administrator, you are asked to add Observation Checklists to several courses on different topics. Which three options can you use for defining the observer?

Option A : Areas of responsibility

Option B : Manager hierarchy

Option C : Named individuals

Option D : Random employee assignment

Option E : One named observer; added as the observer for all courses

Correct Answer: A,B,C

QUESTION: 3

You need to create a specialization with several sections separated by topic, but it needs to contain both required and optional activities. You know which are the required and which are the optional activities and this needs to be unequivocal to the learners joining the specialization. How do you fulfill this requirement?

Option A : From the Specialization Section setup, in every section that contains both required and optional activities,
courses you
make sure to match the "number of activities to complete" value with the exact number of consider required.

Option B : Start creating the specialization and add only the required activities first and save them. Then add the
number of
optional activities after the required activities in the same section. After saving, match the activities to complete"value appropriately in each section.

Option C : In the Specialization Section setup, create one section with all required activities only, one section that
activities to
includes all topics with all optional activities only, and for each, match the "number of complete" value appropriately.

Option D : From the Specialization Section setup, you can classify theactivities in the different sections from the
keep the
most required to the least required by sequencing them from top to bot-tom. You only need to "number of activities to complete" value correct in each section.

Option E : You can create as many different sections as you want,as long as you keep required activities strictly
activities to
separated from optional activities in different sections. You only need to keep the "number of complete" value correct in each section.

Correct Answer: A

Explanation/Reference:

You can group the activities however you need just as long as the "number of activities to complete" match the number of courses you consider required. The otheroptions contain unnecessary constraints. Say you have a section with a total of 5 activities, out of which 3 are required and 2 are optional. Set the number of activities to complete to 3. Now let's look at these scenarios: A) A learner completes the 3 required activities. The learner can proceed further. B) A learner completes 2 of the required activities and 1 optional activity. The learner cannot move further until they complete the 3rd required activity. Both requirements at activity-level and section level will need to be satisfied. In this case, only the activity-level requirements were satisfied.C) A learner completes the 3 required activities and 1 optionalactivity. The learner can proceed further.

QUESTION: 4

You have been asked to provide a Blended Offering titled How to Select Your Health Benefits. The Blended Offering already includes Instructor-Led Training (ILT) activities and now you need to add an E-learning session titled Benefits Overview. How do you add the self-paced offering?

Option A : Go to the Learning Catalog and, on the Offerings tab, select the Blended Offering titled

How to Select Your
Health Benefits, select Edit, and add the Self-Paced Activity called Benefits Overview.

Option B : You cannot edit a Blended Offering after it is saved with an Instructor-Led Training

(ILT): now you must
create a new Blended Offering that includes both ILT and Self-Paced Activity.

Option C : Go to the Learning Catalog and, on the Offerings tab, create a Blended Offering

and add a Self-Paced
Activity called Benefits Overview.

Option D : Go to the Learning Catalog, select Courses, and createa new course called Health

Benefits. Open the
Blended Offering titled How to Select Your Health Benefits and add the newly created
course called
Health Benefits.

Correct Answer: A
