

QUESTION: 1

Identify three correct statements about the integration of Primavera P6 Enterprise Project Portfolio Management and Oracle Project Portfolio Management Cloud. (Choose three.)

Option A : Event completion flows from Primavera P6 Enterprise Project Portfolio Management to Oracle Project Portfolio Management Cloud.

Option B : Billing events flow from Primavera P6 Enterprise Project Portfolio Management to Oracle Project Portfolio Management Cloud.

Option C : Summarized actual quantity and cost flow from Oracle Project Portfolio Management Cloud to Primavera P6 Enterprise Project Portfolio Management.

Option D : Projects and task definitions flow from Oracle Project Portfolio Management Cloud to Primavera P6 Enterprise Project Portfolio Management.

Option E : Project plans and progress flow from Oracle Project Portfolio Management Cloud to Primavera P6 Enterprise Project Portfolio Management.

Correct Answer: A,C,D

Primavera P6 Enterprise Project Portfolio Management and Oracle Fusion Project Portfolio Management: How They Work Together Use Oracle Fusion Project Integration Gateway to integrate Oracle Fusion Project Portfolio Management with Primavera P6 Enterprise Project Portfolio Management. The integration enables project accountants, project billing specialists, and executives to centrally perform project costing, billing, accounting, and executive reporting tasks in Oracle Fusion Project Portfolio Management while enabling each project manager to perform detailed project planning and scheduling in Primavera P6 Enterprise Project Portfolio Management. Oracle Fusion Project Integration Gateway ensures data security, integrity, and efficiency by defining a set framework in which data is exported from and imported into Oracle Fusion Project Portfolio Management. The following table and diagram provide an overview of the flow of information.

Information Type	From Application	To Application
Global integration information	Oracle Fusion Project Portfolio Management	Primavera P6 Enterprise Project Portfolio Management
Projects and task definition	Oracle Fusion Project Portfolio Management	Primavera P6 Enterprise Project Portfolio Management
Summarized project actual quantity and cost	Oracle Fusion Project Portfolio Management

QUESTION: 2

Which three features are part of Oracle Fusion Functional Setup Manager?

Option A : feature opt-in for a best fit configuration

Option B : export and import services for setup data migration between environments

Option C : guided task list for end-to-end setup requirements

Option D : updating an implementation project task list by changing the opt-in configuration to suit the latest requirements

Option E : modifying an existing implementation project task list by selecting more functional areas when needed

Correct Answer: A,B,C

Explanation/Reference:

<https://docs.oracle.com/en/cloud/saas/applications-common/r13-update17d/oafsm/applications-cloud-using-functional-setup-manager.pdf>

Functional Setup Manager offers the following:

- Standardized application configuration and setup experience
- Feature opt-in for a best fit configuration
- Flexible processes for managing setup:

Setup by functional areas for an adopt-as-you-go approach

Implementation projects to manage setup

Upload file to enter setup data in bulk

- Guided task list for end-to-end setup requirements
- Export and import services for setup data migration between environments
- Comprehensive reporting on setup data

QUESTION: 3

Your client has decided to import time cards into Project Costing from Oracle Fusion Time and Labor. They have a requirement to make adjustments to time card entries whenever needed. In which work area will the employees and contingent workers be able to modify their time cards?

- Option A : Both Time and Cost
- Option B : Cost
- Option C : Asset
- Option D : Time

Correct Answer: B

QUESTION: 4

Which four standard objects can you configure to include business specific attributes by using Application Composer for Project Execution Management? (Choose four.)

- Option A : Project Gates
- Option B : Project Resource Request
- Option C : Project Issues
- Option D : Project Milestones
- Option E : Project Resource Assignment
- Option F : Project Deliverables

Correct Answer: A,D

QUESTION: 5

Which three tasks can be performed using the project requirements work area? (Choose three.)

- Option A : creating projects and tasks in the context of backlog items
- Option B : creating issues for the backlog items.
- Option C : adding scrum master to backlog items.
- Option D : tracking backlog item status from the requirement storyboard
- Option E : creating change orders for the backlog items

Correct Answer: A,B,D

QUESTION: 6

As you go through the first-quarter close for your customer, you notice that the burden amounts calculated do not seem to be right. Based on the calculations, you notice that the amounts calculated are not considering the burden schedule override at a task level, which was done during the second month of the

quarter. Identify the reason for this problem. (Choose the best answer.)

Option A : Only new expenditure items charged to the task use the new burden schedule; expenditure items processed earlier cannot be reprocessed.

Option B : Only new expenditure items charged to the task use the new burden schedule; expenditure items processed earlier can be manually marked for reprocessing.

Option C : You can enable automatic reprocessing of expenditure items processed before the burden schedule change.

Option D : All expenditure items charged to the task use the new burden schedule.

Option E :

Correct Answer: B

QUESTION: 7

You create a project schedule with a Shifts element. Identify two more elements that can be part of a project schedule. (Choose two.)

Option A : Exceptions

Option B : Accounting Calendar

Option C : Workday Patterns

Option D : Time Off

Option E : Expenditure Type

Correct Answer: A,C

Explanation/Reference:

Reference https://docs.oracle.com/cloud/latest/projectcs_gs/FAPFM/FAPFM1192914.htm

Topic - Creating Calendars for Projects and Resources: Procedure

Project Schedules are used as a base for project and resource calendars in Project Execution Management applications. The smallest scheduling unit is a day. For example, you can define the number of hours in a day but, you can't schedule work for a specific time of the day.

The following are the elements of a schedule:

Shifts

Workday patterns

Exceptions

QUESTION: 8

Select two correct statements about project classifications on a template. (Choose two.)

Option A : Set Code is not required for a project class category in a project classification.

Option B : Project Classification is a mandatory field on a project template.

Option C : When a project is created from a template, the required project classifications must be entered.

Option D : Project class category in a project classification must be associated with a Set Code.

Correct Answer: A,C

QUESTION: 9

Which three are true of what you can do in the Project Requirements work area?

Option A : Create an implementation project.

Option B : Organize backlog items by requirements.

Option C : Create an execution project.

Option D : Create project tasks for backlog items.

Option E : Manage your list of backlog items.

Correct Answer: A,B,D

Explanation/Reference:

<https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19b/oapem/manage-project-requirements.html#OAPEM874365>

Project Requirements: Explained

Requirements enable you to capture your business needs. If you manage projects using the Agile development methodology, you start by identifying the high-level requirements and decomposing them further to manage the completion of work on the requirement.

You use the Project Requirements work area to:

Organize backlog items by requirements

Manage your list of backlog items

Create project tasks for backlog items

QUESTION: 10

You are set up as a Follower in Manage Tasks. Which two abilities can you accomplish? (Choose two.)

Option A : Enter progress for tasks.

Option B : Receive email notifications about changes that team members make to a task.

Option C : View task details and the task activity stream.

Option D : Edit task details.

Correct Answer: B,C

Explanation/Reference:

Ref:

<https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19a/oapem/execute-project-tasks-and-deliverables.html#OAPEM1122082>

Followers are persons who aren't working on the task but have an interest in reviewing the task progress. Only the resources and other followers can add followers to a task. If a resource assigns the task to another team member, the application automatically changes the original resource to a follower.

What's the difference between my tasks and tasks that I follow?

You can edit task details and enter progress for your tasks on the Manage Tasks page. If a task has multiple resources, only the primary resource can edit the task.

When you follow a task, you can view the task details and see the task activity stream. You receive e-mail notifications of changes that team members make to the task.

If a resource reassigns the task to another team member, then the previous resource automatically becomes a follower.

QUESTION: 11

As part of maintaining (importing new employees that were added last week) project enterprise labor resources in your organization, you submit the Maintain Project Enterprise Labor Resources process to create and update resources based on changes in HCM. You define maintenance conditions on the Manage Project Enterprise Labor Resource page to process both employees and contingent workers. What are the three parameters based on which the system identifies the new resources? (Choose three.)

Option A : Business Unit

Option B : Organization

Option C : Project Unit

Option D : Jobs

Option E : Department

Correct Answer: A,C,D

QUESTION: 12

As part of maintaining (importing new employees that were added last week) project enterprise labor resources in your organization, you submit the Maintain Project Enterprise Labor Resources process to create and update resources based on changes in HCM. You define maintenance conditions on the Manage Project Enterprise Labor Resource page to process both employees and contingent workers. Which three are parameters that are based on which the system identifies the new resources?

- Option A : Department
- Option B : Project Unit
- Option C : Jobs
- Option D : Business Unit
- Option E : Organization

Correct Answer: A,C,D
