

QUESTION: 1

If a Rate Record and a Rate Offering are configured with conflicting values in the same data elements, how does OTM address this?

- Option A : Such a conflict cannot exist in OTM
- Option B : The Rate Record will take priority over the Rate Offering configuration
- Option C : During planning, the user will have the option of indicating if OTM should prioritize either the Rate Offering or the Rate Record setting
- Option D : The Rate Offering will take priority over the Rate Record configuration
- Option E : OTM-s planning engine will run the solver for both settings, but only consider the least cost result

Correct Answer: A
