QUESTION: 1

What type of doclet is excluded from the review and signoff phases?

Option A : Author
Option B : Supplemental
Option C : Reference
Option D : Style Sample
Option E : package

Correct Answer: B

Explanation/Reference:

Explanation

Supplemental documents such as procedures, instructions, reference material, and so on, can be uploaded into a report package as a supplemental doclet. Supplemental documents can be any type of document file (for example, PDF, Excel, Word, and so on). As the content for supplemental doclets is not included within the merged report, these doclets are excluded from the review and sign off processes. The supplemental doclet contents cannot be viewed online, but users can download and use native programs to open the supplemental doclet in the same way that you can work with third party artifacts in the library.

QUESTION: 2

When adding in a management report to a reference doclet, what type of artifact must be created for embedding the report?

Option A : Disclosure Management doclet
Option B : Enterprise Performance Reporting Cloud (EPRCS) custom application report
Option C : Report reference doclet
Option D : Excel reference doclet

Correct Answer: B

QUESTION: 3

At which time can the report package owner choose to initiate a review instance?

Option A : never -- only the Admin may initiate a review instance
Option B : when the Author Phase is completed

Option C : at any time
Option D : when the Author Phase is Approved

Correct Answer: C

Explanation/Reference:

Explanation

The report package owner can choose to initiate a review instance at any time. Oracle Enterprise Performance Reporting Cloud does not require the author phase to be in a completed status. Once the first review cycle is initiated, the report package status changes to "Under Review".
