Question: 1

Universal Containers requested to leverage Lightning Web Components (LWC) to improve support reps' user experience. LWC will be used as view layer, and Apex classes will have the business logic. Which attention points should the development team consider when implementing this solution?

- A. Once that Apex runs on system mode, the development team needs to enforce record visibility.
- B. Create test classes including runAs to test different users accessing the data.
- C. Use isSharesble, isEditable, and isCreatable to enforce field permissions.

Answer: A

Question: 2

Universal Containers has expanded to sell virtual containers for data storage. Virtual container work orders are provisioned immediately by the system and therefore cannot be changed by a sales rep. What is an optimal approach to implement these requirements?

- A. Implement a sharing rule that changes access for all Work Orders to Read.
- B. Change the Record Type/Page Layout assignment for Work Orders to Read Only.
- C. Remove the Work Order Edit permission from the Sales Representative profile.

Answer: C

Question: 3

Universal Containers' organization wide-defaults model is Private for the Account object. A sales rep owns two opportunities in one Account. The Sales Rep profile has Create/Edit access to opportunity records.

Which level of access will the sales rep have to the related Account record?

- A. Read access
- B. Read/Create/Edit access
- C. No access

Answer: A

Question: 4

Which method should be used to grant an unrelated group of users access to a set of records?

- A. Role Hierarchy
- B. Sharing Sects
- C. Public Groups

Answer: B

Question: 5

Universal Containers implemented Sales Cloud and requested that sales agents have access to products and prices the company sells, and to be able to create opportunities for its customers. What should the organization-wide defaults be for pricebook?

- A. Public Read-Only
- B. View
- C. Use

Answer: C
